

Playbond

IMPACT ABSORBING RUBBER PLAYGROUND SURFACING

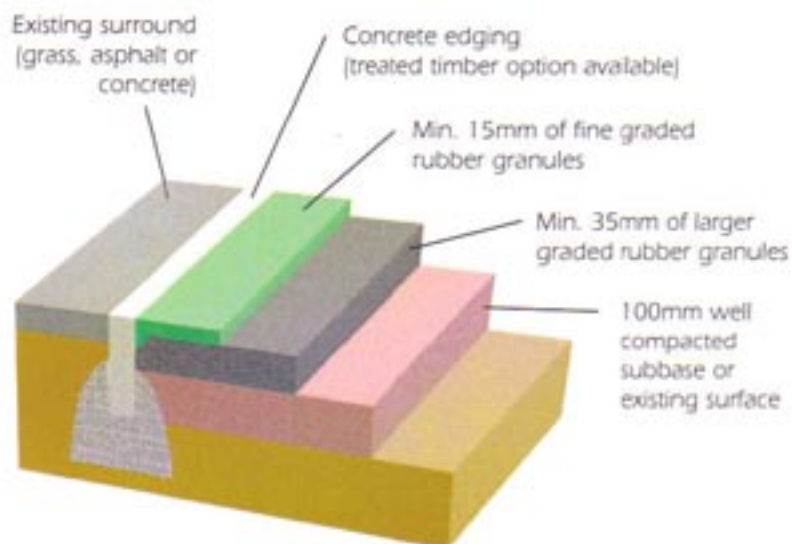

PLAYBOND is an impact absorbing surfacing specially formulated for children's play areas, and designed to meet the latest performance standards of BS EN 1177.

- Environmentally sound - uses re-cycled rubber from Cornwall
- Can be laid onto any size or shaped area
- Can be laid around existing play equipment
- Seamless finish – to avoid trips and falls
- Wide range of bright colours available
- Patterns and shapes – to brighten up play areas
- Long lasting and very durable
- Low maintenance and easily cleaned
- No settlement or movement unlike sand and/or bark
- Not easily soiled like sand and/or bark

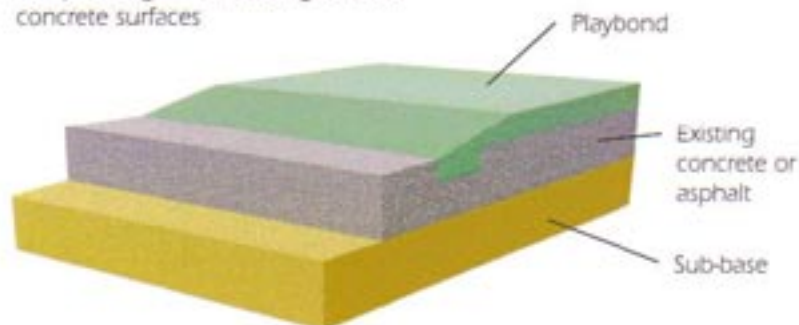

Call now **01726 843992** for our comprehensive free site survey to answer these questions!

- Do you know the maximum free fall height of your play equipment?
- Do you know what the requirements are for the area of surfacing around your play equipment?
- Are you familiar with the latest requirements under BS EN 11777
- What sort of depth surfacing is required for your play equipment?
- What edge details are acceptable for best performance?

TYPICAL DETAILS

Ramped edges - for existing asphalt or concrete surfaces
